

## CLEANING AND CARE

01 To remove dust and dirt, buff gently with a soft and clean cotton cloth.

Do not use chemical (glass) cleaners. Avoid contact with anything that could scratch the item

02 Always hold the piece by its body and never by the protruding parts.

Use a silver polishing cloth for metal parts. Polish frequently with a brush to maintain brilliance

03 For surfaces that are difficult to get to, use a new cosmetics brush or paint-brush. For more stubborn dirt, dampen a clean cloth with luke-warm water

THE FOLLOWING FACTORS MAY AFFECT THE GLUED CRYSTAL OBJECT:

**HEAT • HUMIDITY • PRESSURE**

**HEAT:** Do not store or display in high temperatures, such as in direct sunlight

**HUMIDITY:** Do not store in a humid environment

**PRESSURE:** When touching, packing, or cleaning crystal objects, avoid excessive pressure which may damage the glued piece
